

**Entry Security. Edge Decisions.  
Reverse Proxy.**

Cloud909 — Series A Investor Presentation

# The Problem

- Web infrastructure faces growing bot traffic, cyber threats, and latency issues.
- Traditional hosting cannot adapt dynamically to user context.
- Security threats reach application servers before filtering.
- Global websites struggle to serve localized experiences.

# The Cloud909 Solution

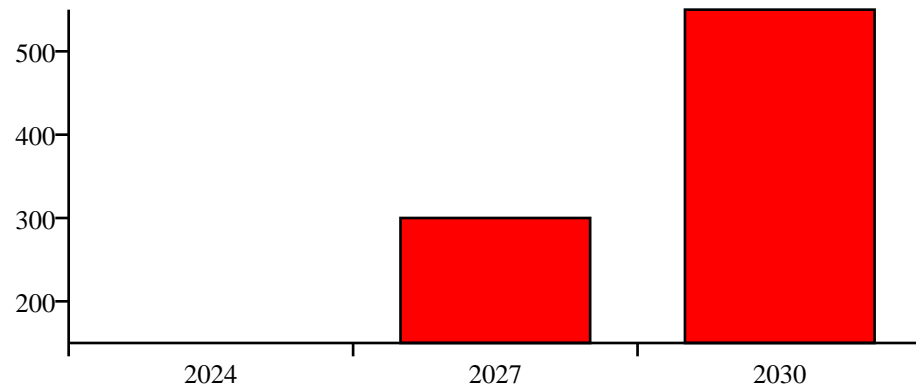

- AI-driven reverse proxy making intelligent edge decisions.
- Security filtering before traffic reaches origin servers.
- Dynamic routing based on language, location, device, and time.
- Infrastructure layer improving performance, security, and personalization.

# Platform Architecture

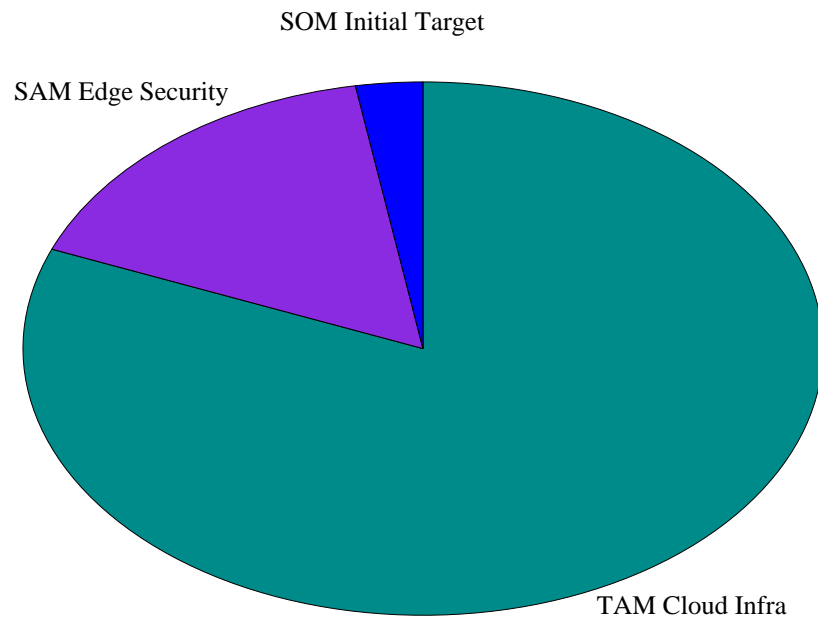

# Market Opportunity

- Cloud infrastructure market > \$600B globally.
- Edge computing and CDN markets expanding rapidly.
- Security and performance mandatory for modern web apps.

# TAM / SAM / SOM

# Competitive Landscape

Platform	Strength	Weakness
Cloudflare	Global edge network	Complex enterprise pricing
Akamai	Enterprise CDN leader	Legacy stack
Fastly	Developer focused	Limited security features
AWS CloudFront	AWS integration	Vendor lock-in
Cloud909	AI edge intelligence	Early stage

# Why Cloud909 Wins

- Pre-website security filtering using DNS-level routing.
- AI traffic intelligence engine.
- Edge decisions before application interaction.
- Localization and infrastructure optimization.

# Use Cases

- Global websites delivering localized experiences.
- Bot filtering and cybersecurity protection.
- High-traffic events and load balancing.
- E-commerce platforms.

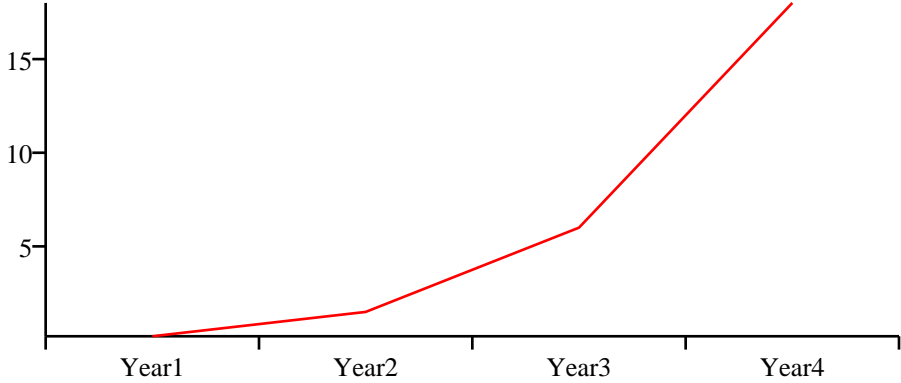

# Business Model

- SaaS infrastructure subscription.
- Traffic■based enterprise pricing.
- Security analytics modules.
- Strategic hosting partnerships.

# Go-To-Market Strategy

- Developer-first adoption.
- Enterprise cybersecurity positioning.
- Strategic cloud hosting partnerships.
- Inbound developer marketing.

# Revenue Projection

# Product Roadmap

- MVP launch and early adopter testing.
- AI decision engine rollout.
- Enterprise security features.
- Global infrastructure partnerships.

# Team

- Founder: Eric Melin — entrepreneur and SaaS executive.
- Experience building internet businesses and digital platforms.
- Advisors from cloud computing and cybersecurity.

# Vision

- Become the intelligent entry layer of the internet.
- Automate edge decisions for websites globally.
- Define the next generation of infrastructure security.
